Professional Experience

Vice President of Engineering **iToll.ir**
2020–now

- iToll.ir is a website handling payments related to cars, such as toll payment, car insurance, etc. I'm managing a team of 15 developers, also I'm constantly communicating with product manager, business development team and CEO in order to keep technical team aligned with needs of business. I also supervise technical team members and help them find their career path I usually take part in technical interviews with applicants. I take part in hands-on development in case of emergency or tasks that need more experience and accuracy.

Technical Consultant **Radar361.com**
2018–2020

- Radar361.com is a meta search engine for hotels and other accommodations, At Radar361, I've managed a team of 4 developers and led them towards solving challenges of the product. The main challenge in this product was maintaining a list of thousands of hotels and hotel rooms, each consisting of many prices for each day in calendar.

Chief Technology Officer **MrBilit.com**
2018–2020

- MrBilit.com is one of the main players in online travel agency market. The main job of MrBilit.com is selling tickets to thousands of customers and the biggest challenge of this product is handling a large volume of transactions, visitors and maintaining and updating list of all the flights, buses and trains. At Mrbilit I've managed a team of 5 developers and also I've contributed in developing backend, frontend and server management when needed.

Senior Full stack Developer **MrBilit.com**
2015–2018

At this period I have developed most parts of MrBilit.com as one of two developers in the initial team.

I also did performance optimizations in database, and designed an architecture for the services used in this product.

Senior Full stack Developer

AirplaneTicket.ir

2015-2018

- ◉ AirplaneTicket.ir was the first website who issued flights tickets online. We started this job by reverse engineering travel agency software and rewriting them in web frameworks.

Software Developer

AtighGasht Co

2013-2015

- ◉ At this time I started my first professional experience in software development, and we have launched a website for showing flight tickets to customers.
